Physics and Chemistry of Minerals

In Cooperation with the International Mineralogical Association (IMA)

Founded in 1977. Founding Editor: S.S. Hafner.
Volumes 1–9 (1977–1983) edited by S.S. Hafner, A.S. Marfunin, and C.T. Prewitt,
from Volume 10 (1984) by I. Jackson, A.S. Marfunin, C.T. Prewitt, F. Seifert
from Volume 13 (1986) by I. Jackson, A.S. Marfunin, A. Navrotsky, F. Seifert
from Volume 17 (1990) by I. Jackson, K. Langer, A.S. Marfunin, A. Navrotzky
from Volume 18 (1991) by I. Jackson, D.L. Kohlstedt, K. Langer, A.S. Marfunin

Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors; if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA: Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0342-1791, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Subject Index, Volume 21

All mineral names occuring in titles, subtitles and abstracts are indexed. Chemical formulae are according to M. Fleischer, Glossary of Mineral Species, 1983 (in some cases simplified) or as given by the author. The numbers refer to the title page.

A

Åkermanite type, $Ca_2CoSi_2O_7$, normal to incommensurate phase transition 469
Åkermanite type phases, phase transition in, and optical diffraction 6
Albite, $NaAlSi_3O_8$, reactions at high pressure and high temperature 12
Alkali feldspar, solid solutions, high pressure-high temperature reactions in 12
Almandine, $Fe_3Al_2(SiO_4)_3$, electronic absorption spectra of solid solutions with pyrope and spessartine and thermodynamics 516
$AlPO_4$, cristobalite type, α-β transition of 67
Analcime, $NaAlSi_2O_6 \cdot H_2O$, rotational dynamics of molecular water in 451
Annite, $KFe_3Si_3AlO_{10}(OH)_2$, solid solution with phlogopite, nuclear gamma ray resonance of ^{57}Fe in, and band fitting 258
Anorthoclase, (Na, K) $AlSi_3O_8$, displacive phase transition in 325

B

Bassanite, $2CaSO_4 \cdot H_2O$, dynamics of molecular water in 539
Belangoerite, $(Mg, Fe^{2+}, Fe^{3+})_{21}O_3(OH)_{20}$-$(Si_4O_{12})_2$, nuclear gamma ray resonance of 222
Berlinite, $AlPO_4$, shock pressure and microstructures of 133
Beryl, $Al_2Be_3Si_6O_{18}$, electronic absorption spectra of Cr^{3+} in 360
Bornite, Cu_5FeS_4, electronic structure of 317
Braunite $Mn^{2+}Mn_6^{3+}SiO_{12}$, thermodynamic properties of 228

C

Calorimetry, of ilmenite and its high pressure polymorph 207
–, of zircons 140
Carlosturanite, $(Mg, Fe)_{21}(Si_{12}O_{28}(OH)_2)(OH)_{30} \cdot H_2O$, nuclear gamma ray resonance of 222
Chalcocite, Cu_2O, electronic structure of 317
Chemical bonding, in copper sulfide minerals from sulfur K- and L-edge (XANES) 317
Chemical bonding, and electron density in natrolite 309
Chiolite, $Na_5Al_3Fe_{14}$, NMR (^{23}Na, ^{27}Al, ^{19}F) and phase transition in 373
Chrysotile, $Mg_3Si_2O_5(OH)_4$, model for polygonization, based on dislocations 330
Compressibility, of pyrope and majorite type garnets 344
Computer simulation, of Al/Si ordering in gehlenite 110
–, of HRTEM image of mullite 546
Cordierite, $Mg_2Al_4Si_5O_{18}$, dynamics of molecular water in 539
Corundum, Al_2O_3, electronic absorption spectrum of Cr^{3+} in 360
Covellite, CuS, electronic structure of 317
Cristobalite, SiO_2, high pressure phase transition 481
Cristobalite type, $AlPO_4$, phase transition in 67
Cr_2SiO_4, structure of and bonding in 104
Cryolite, Na_3AlF_6, (NMR (^{23}Na, ^{27}Al, ^{19}F) and pase transition in 373
Crystal growth, of fayalite, kinetics of 156
Crystal structure, of Cr_2SiO_4 104
–, and polygonization in serpentine 330
–, of synthetic almandine-skiagite and andradite-skiagite solid solutions 117
Cubanite, $CuFe_2S_3$, electronic structure of 317

D

Defects, dislocations as a basis of a model for polygonization in serpentine 330
–, and high resolution electron microscopy of mullite 546
–, radiation induced in kaolinite 85
Diffusion, and kinetics of fayalite growth 156
–, tracer-, of Mg in forsterite 489
Diopside, $CaMgSi_2O_6$, electronic absorption spectra of Cr^{3+} in 360

E

Electric conductivity, of graphite and amorphous carbon under high pressure 1
Electrochemical measurements, solid state emf and thermodynamics of manganese silicates 228
Electron diffraction, of tridymite polymorphs 421
Electron energy-loss spectroscopy (EELS), $L_{2,3}$ edges in manganese minerals 191
Electronic absorption spectra, of Cr^{3+} in kyanite and site geometries in 526
–, of Cr^{3+} in sapphirine 29
–, of Cr^{3+} in silicate minerals on changing temperature 360
–, of Fe^{2+} in almandine-pyrope and almandine-spessartine garnets and solid solution thermodynamics 516
–, of Fe, Ti substituted pyrope 434
–, of Mn^{4+} in octahedral field of oxygen based structure 294
Electronic charge transfer, experimental modelling of FeTi- in pyrope 434
Electron paramagnetic resonance (EPR), on paramagnetic defects in kaolinite 85

F

Fayalite, Fe_2SiO_4, kinetics of growth 156
Ferritungstite, $(K, Ca, Na)(W^{6+}Fe^{3+})$-$(O, OH)_6 \cdot H_2O$, Raman spectra of 63
Forsterite, Mg_2SiO_4, Mg tracer diffusion in 489

G

Gahnite, $ZnAl_2O_4$, solid solutions with hercynite, cation ordering in 460
Garnet group, almandine-skiagite and andradite-skiagite solid solutions 117
–, compressibility of pyrope and majorite type garnets 344
–, solid solution thermodynamics of almandine-pyrope and almandine-spessartine 516
Gehlenite, $Ca_2Al(AlSi)O_7$, Al/Si ordering in 110
Geikielite, $MgTiO_3$, Raman spectra of, at high pressure and high temperature 441
Glasses, slicate, Ti K-edge spectroscopy (XANES) of 501
Graphite, C, electric conductivity under high pressure 1
Gypsum, $CaSO_4 \cdot 2H_2O$, dynamics of molecular water in 539

H

Hercynite, $FeAl_2O_4$, solid solutions with gahnite, cation ordering in 460
High pressure, and coordination of Ti in silicate glasses 501
–, electric conductivity of graphite and amorphous carbon under 1
–, infrared spectra and thermodynamic properties of perovskite type $CaGeO_3$ at 78
–, high temperature phase reactions of $K_2O \cdot Al_2O_3 \cdot 6SiO_2$ from synchrotron studies 387
–, phase transition of cristobalite 481
–, Raman spectra of geikielite 441
–, – – equilibria and thermodynamics of the $2MgO \cdot SiO_2$ system derived from 351
–, reaction in the system $NaAlSi_3O_8 - KAlSi_3O_8$ 12
Hydroxyl groups, ab initio calculations on $(OH)_4$ defects in quartz 150
–, orientation of, in optically anisotropic crystals 24

I

Ilmenite type $MgSiO_3$, quantum mechanical calculation of relative pressure stability 285

Infrared absorption (IR) spectra, of opals 166
–, of perovskite type $CaGeO_3$ at high pressures 78

K

Kaolinite, $Al_2Si_2O_5(OH)_4$, paramagnetic defects in 85
Kinetics, of diffusion controlled growth of fayalite 156
Kyanite, Al_2SiO_5, site geometries and Cr^{3+} energy levels in 526

L

Leucite type phases, ^{29}Si NMR study of 176
Liebenbergite Ni_2SiO_4, creep and kinetic decomposition of 234
Light scattering, circular diffuse, by optical diffraction, and phase transition in akermanite 6
–, and strain relaxation in $NaAlSi_2O_6$ melt 18
Lizardite, $Mg_3Si_2O_5(OH)_4$, chrysotile to lizardite transition as a basis for a model of serpentine polygonization 330
Lonsdalite, C 1

M

Manganese minerals, Mn-$L_{2,3}$-edges, electron energy-loss spectroscopy 191
Melts, strain relaxation and light scattering in $NaAlSi_2O_6$- 18
Mica group, phlogopite-annite solid solutions, nuclear gamma ray resonance of ^{57}Fe and band fitting 258
Mössbauer spectroscopy, cf. Nuclear gamma ray resonance (NGR)
Modelling, of Al/Si ordering in gehlenite 110
–, of cation ordering in orthopyroxenes by classical and Landau approaches 555
–, electrostatic potential of talc and vibrational frequency of an adsorbed proton 213
–, of framework silica structures 269
Mullite, $Al_6Si_2O_{13}$, high resolution electron microscopy of, and its modelling 546

N

Natrolite, $Na_2Al_2Si_3O_{10}\cdot 2H_2O$, deformation electron densities in 309
Neutron scattering, inelastic, and dynamics of molecular water in bassanite, gypsum and cordierite 539
–, –, and rotational dynamics of H_2O in analcime 451
Nuclear gamma ray resonance (NGR), of ^{57}Fe in almandine-skiagite and andradite-skiagite garnets 117
–, of belangeroite and carlosturanite 222
–, of hercynite-gahnite solid solutions 460
–, of octahedral $^{57}Fe^{2+}$ in plogopite-annite micas and band fitting 258
–, of paramagnetic ^{57}Fe minerals and theory of band fitting 244, 250
Nuclear magnetic resonance (NMR), of ^{23}Na, ^{27}Al, ^{19}F and phase transitions in cryolite and chiolite 373
–, ^{29}Si in opals 166
–, – – synthetic leucite type phases 176

O

Olivine group, Ni_2SiO_4, creep and kinetic decomposition of 234
Opal, $SiO_2\cdot nH_2O$, NMR, XRD, IR on microcrystalline 166
Optical absorption spectra, cf. electronic absorption spectra
Order-disorder, Al/Si in gehlenite, computer simulation of 110
– in hercynite-gahnite solid solutions 460

P

Perovskite type, $CaGeO_3$, infrared spectra at high pressures 78
–, $MgSiO_3$, quantum mechanical calculation of relative pressure stability 285
–, $FeTiO_3$, thermodynamic stability of 207
Phase transition, in cristobalite at high pressure 481
–, α-β of cristobalite type $AlPO_4$ 67
–, displacive, in anorthoclase 325
–, –, in cryolite and chiolite 373
–, graphite to lonsdalite at high pressure, and electric conductivity 1
–, normal to incommensurate, in åkermanite type $Ca_2CoSi_2O_7$ 469
–, and optical diffraction in åkermanite 6
–, in tridymite, by electron diffraction 421
Phlogopite, $KMg_3Si_3AlO_{10}(OH)_2$, solid solution with annite, Nuclear gamma ray rasonance of ^{57}Fe band fitting in 258
Phyllosilicate group, ab initio calculation of electron density for the tetrahedral sheet 401
Pyrite, FeS_2, optical anisotropy, a polishing effect 97
Pyrope, $Mg_3Al_2(SiO_4)_3$, compressibility of 344
–, electronic absorption spectrum of Cr^{3+} in 360
–, solid solution with almandine, electronic absorption spectra and thermodynamics of 516
–, Fe,Ti-substituted, electronic absorption spectra of 434
Pyroxene group, orthopyroxenes, thermodynamic modelling of cation distribution in 555
–, –, XANES spectra and MO calculations of iron sites in 299

Q

Quantum mechanics, ab initio calculation of electron density of $(H_2Si_2O_5)$ tetrahedral sheet 401
–, – – – on $(OH)_4$ defects in quartz 150
–, ab initio potential calculations on $H_6Si_2O_7$ and modelling of framework silicas 269
–, calculation of the relative pressure stability of phases in the system $MgO\cdot SiO_2$ 285

R

Raman spectra, of cristobalite at high pressure 481
–, of ferritungstite 63
–, of geikielite at high pressure and high temperature 441
–, high pressure, of γ-Mg_2SiO_4 and equilibria in the system $2MgO\cdot SiO_2$ 351
Rhodonite, $MnSiO_3$, thermodynamic properties of 228
Ringwoodite, $\gamma-Mg_2SiO_4$, equation of state and thermodynamic properties 407
–, – thermodynamics and the phase diagram of the system $2MgO\cdot SiO_2$ from high pressure Raman spectra 351

S

Sanidine, $KAlSi_3O_8$, reactions at high pressure and high temperature 12
Sapphirine, $(Mg,Al)_8(Al,Si)_6O_{20}$, electronic absorption spectra of Cr^{3+} in 29
Serpentine group, model for polygonization based on dislocations 330
Shock effects, and microstructural defects in berlinite 133
Solid solution thermodynamics, hercynite-gahnite solid solutions 460
–, of almandine-pyrope and almandine spessartine garnets, influence of Fe^{2+} crystal field stabilization 516
–, of almandine-skiagite and andradite-skiagite garnets 117
–, modelling of cation ordering in orthopyroxenes 555
–, strontianite-witherite solid solutions 392
Spessartine, $Mn_3Al_2(SiO_4)_3$, solid solution with almandine, electronic absorption spectra and thermodynamics of 516
Spinel group, γ-Fe_2SiO_4, thermodynamic properties 413
–, γ-Mg_2SiO_4, thermodynamic properties and reactions 351, 407
Spinel, $MgAl_2O_4$, electronic absorption spectrum of Cr^{3+} in 360
Strontianite, $SrCO_3$, solid solution with witherite, thermodynamic properties of 392
Synthetic minerals, kermanite type 6
–, alkalifeldspars 12
–, almandine-pyrope garnets 516
–, almandine-spessartine garnets 516
–, almandine-skiagite garnets 117
–, andradite-skiagite garnets 117
–, annite 258
–, berlinite 67, 133
–, braunite 228
–, fayalite 156
–, hercynite-gahnite solid solutions 460
–, ilmenite 207
–, liebenbergite 234
–, majorite 344
–, phlogopite 258
–, pyrope 434
–, rhodonite 228

–, tephroite 228

T

Talc, $Mg_3Si_4O_{10}(OH)_2$, computation of the electrostatic potential and vibrational frequency of an adsorbed proton 213
Tephroite, Mn_2SiO_4, thermodynamic properties of 228
Thermodynamic properties, equation of state of γ-Mg_2SiO_4 351
–, of minerals, calculation of internally consistent data by Bayes estimation 36, 50
–, pVT-data for γ-Fe_2SiO_4 413
–, of perovskite type $CaGeO_3$ at high pressures 78
–, and radiation damage in zircons 140
–, manganese silicates 228
–, of strontianite-whitherite solid solutions 392
Topaz, $Al_2SiO_4(OH,F)_2$, electronic absorption spectra of Cr^{3+} in 360
–, orientation of OH in 24
Transmission electron microscopy (TEM), high resolution, of mullite 546
–, and $MnL_{2,3}$ edge EELS of manganese minerals 191
–, shock pressurized berlinite 133
Tridymite, SiO_2, phase transition in 421

U

Uvarovite, $Ca_3Cr_2(SiO_4)_3$, electronic absorption spectrum of 360

V

Vibrational spectra, of ferritungstite, experimental and calculated 63
–, cf. infrared absorption (IR) spectra, and Raman spectra

W

Water, molecular, dynamics in bassanite, gypsum and cordierite 539
–, –, in analcime 451
Witherite, $BaCO_3$, solid solution with strontianite, thermodynamic properties 392

X

X-ray diffraction, on displacive phase transition in anorthoclase 325
–, by opals
–, structure refinements on hercynite-gahnite solid solutions 460
–, –, on synthetic almandine-skiagite and andradite-skiagite solid solutions 117
X-ray spectra, (XANES) and MO calculations on the iron sites in orthopyroxene 299
–, –, (XANES) sulfur K- and L-edge of copper sulfide minerals 317
–, (XANES) of Ti K-edge in Ti-bearing silicate glasses 501

Z

Zircon, $ZrSiO_4$, radiation damage and thermodynamic properties of 140
